

A proposal for a privately-financed podway to transport people and goods for

Belgium

939 km network with
40,759 pods and 1,265 stops serving
75% of population within 5 min. of a stop.

**High capacity • High speed • Nonstop • 24/7
Sustainable • Zero Wait • Door-to-door • Resilient**

750 MW solar & wind generation to power 62,380 households
Reduction of 717,505 tons CO2 per year

We propose to build and operate a privately-financed public transit podway that eliminates issues with **traffic congestion, parking, pollution, and safety.**

Please watch a 6-minute presentation at transitx.com/v

A podway is a fleet of automated electric vehicles (pods) for passengers and freight on a micro-guideway providing equitable public transportation to replace cars, buses, trains, and trucks.

Privately Financed

No government funding, subsidies, guarantees or special tax incentives are necessary. The system is very low cost so revenue from fares, freight, renewables and advertising makes it profitable.

Equitable fares

75% of fares are capped based on the Fair Fare Formula. The price of a typical shared 1 km trip is 0.24 EUR (US\$0.52) or 0.20 EUR per km (US\$0.23/km).

Jobs and Workforce Development

The project creates 2,073 local construction/manufacturing jobs. The project directly employs 16,131 workers, and creates 12,840 jobs from secondary effects. Transportation workers who get displaced are given priority.

Eliminates traffic congestion

Pods can travel in 6-pod trains with 1 second headway providing over 80,000 passenger seats per hour — equivalent to a 40 lane highway.

Green and Walkable

A podway removes vehicular traffic from roads, enabling streets to transition into green and pedestrian-friendly spaces.

Disease and Health

The system prevents the spread of diseases, improves quality of air and water, improves access to healthcare, and encourages walking.

Simplified Rights-of-Way on Utility Easements

Podways can fit anywhere because there is no dedicated footprint — pods travel alongside roadways. In the space of one parked car, a pod stop has a capacity of 2,000 passenger boardings per hour.

Faster commutes

Pods travel non-stop at 72 kph (45 mph) on metro podways and 242 kph (150 mph) on high-speed podways — delivering the fastest door-to-door trips of any travel mode.

Eliminates pollution: Air, Sound, Light, Water

Pods are quiet, efficient and have zero emissions and zero carbon. Pods offer less visual impact than the existing roads and vehicles. Pods don't have headlights and podways do not need to be lit.

Sustainable, Efficient, and Zero Carbon

Pods achieve over 20 times the efficiency of electric cars and are 100% powered by renewable energy. Pods achieve zero carbon by eliminating green house gases (GHG) from transportation.

Higher Resiliency

System continues to operate through flooding, earthquakes, dust/snow/ice, high winds, blackouts, road crashes, and heat waves. Damaged podways can be repaired within 24 hours.

Economic Development & Societal Benefits

A podway has positive impacts on education, food security, healthcare access, agriculture, tourism, and reduces poverty and homelessness. The median income would increase by 2%.

Eliminates crashes

With 100% automation, podways eliminate human errors and impaired driving. Orders of magnitude safer than roadways, and eliminating 6,233 road-related injuries and 62 deaths annually.

Fear, Harassment, Race, Justice, Corruption, Accessible

Podways eliminate dangers and fears from public transit and motor vehicles, including traffic stops, assaults, and road-rage. Border crossings can be safer and faster. A podway is handicap accessible.

More Public Transit & Fewer Cars

Pods provide the convenience and privacy that people value in cars, without their negative impacts. A podway combines the best features of public transit, high-speed rail and personal cars.

No Disruption from Construction

Installation is fast, quiet, and clean—all electric without diesel trucks.

Bonded, Guaranteed and Proven

The project's turnkey contracts are with large, established firms. Projects are fully bonded and service levels are guaranteed. Automated small-vehicle transport (PRT) has been operating with a perfect safety record for 40 years in Morgantown, West Virginia.

Revenue Generator

Rights-of-way owners receive a 5% toll share on revenue which is expected to be 783,486,408 EUR (US\$932,722,000) per year.

Lowest Risk

A podway provides compelling benefits with much less risk than other options.

Moving to ZERO

- Congestion
- Waiting
- Pollution
- Crashes
- Land Use
- Downtime
- Energy
- Disruption
- Crime
- Illness
- Taxes
- Gov't Funding
- Travel Time
- Weight
- Excluded
- Noise
- Cost
- Job loss
- Objections
- Cars
- Inequity
- Risk

Financial Viability

The project cost is US\$4,424,530,000 (3,716,606,436 EUR) (\$592 per customer, \$4.7M per km) and expected 22,426,406 trips per day (33% mode share) after 4 years with breakeven at 15% (3,438,779 trips per day). The Cash-Flow-to-Debt Ratio is 353%. We project a 2.3 year payback period, gross margin of 74%, and 127% project IRR. These numbers make the project financially attractive for private investment.

Next Steps

To move forward, we need a binding Memorandum of Understanding for utility easements along roadways. Example letters and agreements at: transitx.com/process

For more information — including presentations, other proposals, and videos — visit transitx.com/Belgium

The Podway Handbook answers many questions about our service, the company, the system, and the way we address: congestion, parking, road safety, pedestrian safety, accessibility, sustainability, fares, renewable energy & storage, construction, aesthetics, operations, economic development, quality of service, security, station footprint, equitability, carbon footprint, transit integration, resiliency, reliability, rights-of-way, and open space.

A 110+ page feasibility study is available under a non-disclosure agreement. Contact us at hello@transitx.com. We look forward to answering your questions and moving forward on a project.

Sincerely,

Green
Quiet
Safe
